Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Frost (5663267) .

Frost discloses a grout comprising a mixture of

1. natural rounded quartz particles: color quartz by 3M is admitted by applicants own specification is a natural rounded and are pigmented; silica sand is also a naturally rounded quartz
2. a polyurethane component see column 4 lines 15-35
3. the silica sad quartz is 30-80 mesh thus falling with applicants range of 50-140 mesh
4. the recited ratio of filler quartz and polyurethane, claim 6 is met by Frost; see column 4, lines 30-35
5. a thickener; column 4, lines 35-40

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Frost in view of Blomeyer (3386944). Blomeyer includes a binding agent having a mixture of polyurethane and quartz particles. The polymer of polyurethane component includes isocyanite. It would have been obvious to add this chemical to the grout of Frost for UV protection and to add anticorrosive properties to the grout.

Claims 4 and 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frost in view of Liotta, Jr. et al (6264737). Frost discloses the above mixtured grout. Liotta discloses the providing grout, applying the grout for tiles for a filling space therebetween and curing the grout by air or clear drying. It would have been obvious to apply the above and recited mixtured grout of Frost as recited and as shown by Liotta et al as a convenient, known, practical and economical means of application.
